

10 reasons to restore your lighting

1. It's the **GREEN** thing to do! "Reduce, Reuse, Recycle"
2. Restoring a lighting fixture uses almost no new materials.
3. Restoring a lighting fixture uses substantially less energy than the manufacturing a new one.
4. Restoration keeps your old lighting out of landfills.
5. Restoring a lighting fixture provides an opportunity to change to more energy efficient lighting source such as cold cathode fluorescent or L.E.D.
6. Restoration allows you to customize your fixture to coordinate with your décor.
7. Restoration of a historic lighting fixture helps preserve our cultural antiques.
8. Restoration preserves the inherent monetary value of an antique.
9. Restoration helps to keep traditional methods of fabrication alive by reviving and sustaining a sector of our workforce that make use of these vanishing, old-world techniques.
10. Antiques Road Show

"The greenest lighting fixture is one that already exists"

~adaptation of a quote by Carl Elefante
